Operating System: Windows.

Code Editor: Visual Studio Code.

Microsoft Office: Experience with Word, Excel, PowerPoint.

PROJECTS

GAME HUB

Web Application <https://abbateangelica.github.io/gamehub-project/index.html>

I developed a web application using technologies such as React, Axios for HTTP requests, React Query for cache management, Chakra UI for a modern interface, and TypeScript for robust code. The project includes: A video game search engine with filtering options by platform and genre, multiple sorting options, and light and dark mode settings.

VIDTUBE

Réplica de Youtube <https://abbateangelica.github.io/gamehub-project/index.html>

I developed a web page using HTML, CSS, and JavaScript to create an interface similar to YouTube. The project structure consists of two pages: the home page and the video playing page, both with responsive design, showing my web layout skills.
